

Accident Investigation Training 2

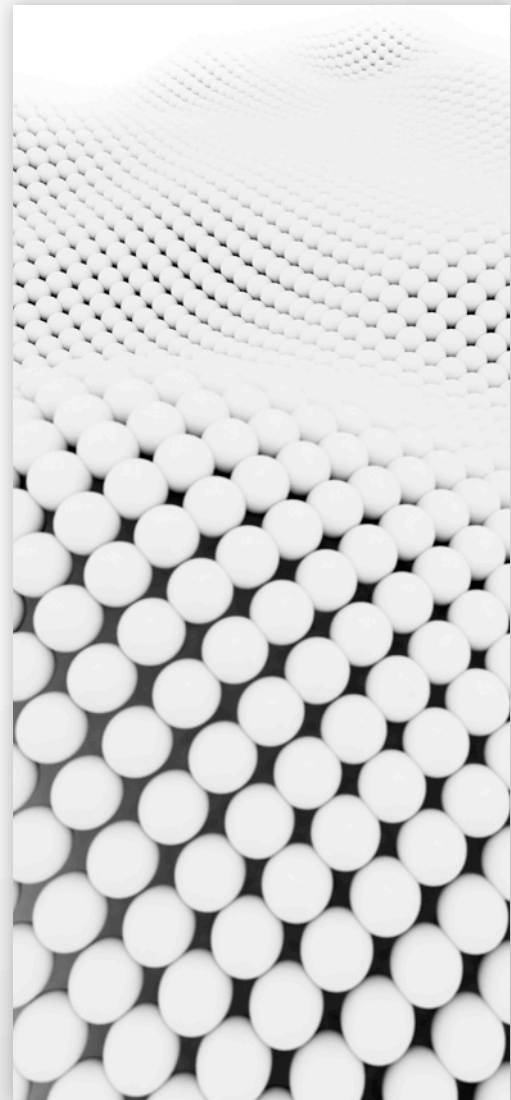

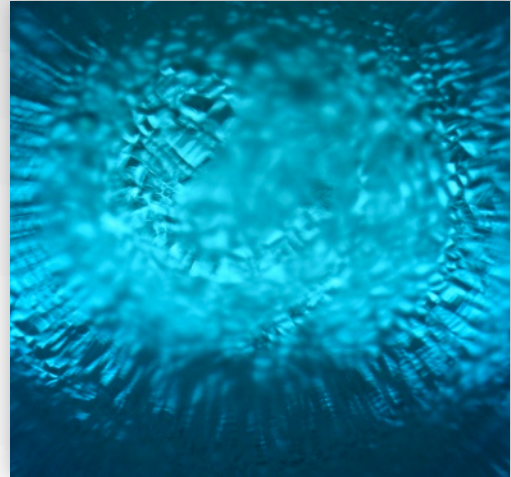

Leading on from our 1 day course, the Chalker Risk Management 3 day Advanced Accident Investigation Course is suitable for experienced investigators such as Health & Safety professionals or for senior management who may have to oversee complex and expensive investigations.

The Advanced Accident Investigation Course is a challenging 3 days exploring the structure, discoveries and outcomes of serious accidents. It is heavily focussed on accident team and evidence management when faced with serious injuries or incidents.

Current course structure includes:

- Multi-causation & Advanced Theory
- Advanced Investigation Techniques
- Case management
- Team selection & building
- Evidence collection
- Root Cause & how to get to it
- Common traps for the investigator
- Advanced witness interviewing
- Dealing with the media
- As a witness in court: what to expect

The course uses group exercises, discussion and demonstrations to help highlight points and develop skill-sets; this is a challenging and intense course which will require work done by delegates outside normal work hours.
